### Rollins Pond

The Rollins Pond Campground is the quiet alternative to Fish Creek as well as serving as the overflow area for Fish Creek. Sites tend to be spaced out more providing for more privacy and less noise. There is also less traffic up in Rollins. Many campers accustomed to a more serene camping experience will appreciate Rollins over its more lively sister, Fish Creek. Rollins is accessed by driving half way through Fish Creek. Rollins features 287 sites, accommodating all equipment from tents to 40ft RV's. 229 sites are directly on the shoreline. Some sites are situated on hills above the shoreline. Like Fish Creek, Rollins does not have hookups. There is a 25 horsepower limit for motorboat. The waterways are restricted to canoes and kayaks. Rollins has its own shower facility, however unlike Fish Creek, showers are free! The park has a boat livery on site which rents canoes (15ft aluminum and lightweights), kayaks (singles and doubles), as well as row boats. Whey Pond which is adjacent to the livery provides opportunities for fishing and is stocked with trout. The campground is open from mid May through Labour Day. Note! We now have a preliminary Rollins Pond Campsite Guide available. Coming soon! (Summer 2011) the all new Rollin Pond website ([rollinspond.com](http://rollinspond.com)).
